

EDGARDO PAZ-ROMERO

☎ (786) 381-4136 | Gedgardopazromero@gmail.com | github.com/edgardopaz
Philadelphia, PA

EDUCATION

Temple University

Aug 2024 – May 2028

Bachelor of Science in Computer Science, GPA: 3.76

Philadelphia, PA

- **Organizations & Clubs:** SEO (Sponsors for Educational Opportunity), ColorStack, SHPE, ACM (Association for Computing Machinery), ENC (Every Nation Campus)

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript, Golang

Cloud & DevOps: AWS, Docker, Linux/Bash, Git, Kubernetes

Backend & Frameworks: Node.js, Express, Flask, SQLite, REST APIs, Selenium, React.js

EXPERIENCE

NextGen Federal Systems

Morganville, WV

Software Engineer Intern

May 2026 – Present

- **Leverage Docker** and local **Kubernetes** clusters to containerize and test **microservices**, simulating production environments for an ML platform.
- Automate local testing environments utilizing **Makefiles** to build and push updated images to a **local container registry**, streamlining **microservice** deployment and testing.
- Participate in Agile development workflows, managing task lifecycles in Jira, maintaining source code in GitLab, and aligning with tech lead during routine technical stand-ups.
- Build and maintain full-stack functionality, writing clean **Python** for backend services and **TypeScript** for frontend interfaces.

Temple HCI Lab

Philadelphia, PA

Undergraduate Researcher

Nov 2025 – Present

- Conduct comprehensive literature reviews utilizing **ACM Digital Library** and **Google Scholar** to analyze **AI adoption** and usage patterns among first-generation students.
- Collaborate with lab researchers to formulate novel **research questions** and design experimental methodologies for **HCI** studies.

Linneman Associates

Philadelphia, PA

Web Consultant

Jun 2025 – Present

- Serve as the **technical link** between leadership and Wix support, diagnosing and resolving platform issues.
- Manage ongoing site content including subscriber pages, checkout emails, and product/shipping settings to keep client operations running smoothly.

PROJECTS

Flashcard Flask | *Python, JavaScript, Flask, SQLite*

- Developed a **full-stack Flask** learning platform that allows users to create, manage, and track custom flashcards.
- Built an interactive study interface with **JavaScript** and included features for card flipping and progress.
- Designed and integrated a **SQLite** database to store study data, ensuring all user content remains persistent.

Password Manager CLI Tool | *Golang, Cobra, SQLite*

- Built a command-line password manager in **Golang** using the **Cobra** framework, storing credentials locally in a **SQLite** database.
- Secured the master password using **Argon2** hashing to protect against automated guessing and brute-force attacks.
- Programmed command-line flags to handle standard **CRUD** operations, allowing users to easily add, view, update, and delete their saved passwords.

Loldle | *Node.js/Express, SQLite*

- Built a **full-stack** Wordle-style game that generated shareable challenge links and saved game data with **SQLite**.
- Designed **RESTful** endpoints for challenge creation, game retrieval, and guess checking with reliable **error handling**.
- Improved code organization and tested core game logic to make the app more maintainable and dependable.
